Tips for Writing a Successful Application

- The Foundation Scholarship is a competitive process, which means not every application will be awarded a scholarship. Full instructions are found in the Application Guide but keep these tips in mind when filling out your forms
- Apply early and take your time! Save your online application and come back to it as many times as you like before submitting it. Applications that are thoughtful, complete, and well written generally receive higher scores than applications that leave out capital letters, have spelling mistakes and one-word answers
- Tell us about yourself and share your successes! Though it can be difficult to write about yourself, this is your chance to celebrate your successes with the Awards Committee and explain why you deserve an award
- When in doubt apply! Undecided if you will be going to school in fall 2022? If there is a possibility – APPLY! – If you do not end up going to school, it will not impact your chances of receiving an award in the future, and if you do end up going to school you will already be in the running for an award
- Ask for help. If you are having difficulty with the online form or have questions about what you should write and what you need to include, be in touch with your Worker or Foundation staff for help
